

Target Score Calculator

Step 1 - Calculate 1st Innings Run Rate

$$\begin{array}{l} \text{1st Innings Runs} \\ \boxed{} \end{array} \div \begin{array}{l} \text{1st Innings Overs} \\ \boxed{} \end{array} = \begin{array}{l} \text{Run Rate (to 2 decimal places)} \\ \boxed{} \end{array}$$

Step 2 - Calculate Runs Adjustment

$$\begin{array}{l} \text{Run Rate} \\ \boxed{} \end{array} \times \begin{array}{l} \text{Overs Lost} \\ \boxed{} \end{array} = \begin{array}{l} \text{Total Runs Lost} \\ \boxed{} \end{array}$$

$$\begin{array}{l} \text{Total Runs Lost} \\ \boxed{} \end{array} \times \mathbf{0.75} = \begin{array}{l} \text{Runs Adjustment} \\ \boxed{} \end{array} \text{ (rounded down to whole runs)}$$

Step 3 - Calculate Par and Target Score

$$\begin{array}{l} \text{1st Innings Runs} \\ \boxed{} \end{array} - \begin{array}{l} \text{Runs Adjustment} \\ \boxed{} \end{array} = \begin{array}{l} \boxed{} \\ \boxed{} \end{array}$$

Par Score (to tie)
Target Score (to win)
